Sep 2026 – Present

A freshman Computer Science student currently building a strong foundation in computer hardware and software development and computer science fundamentals.

Projects

Rabet - Startups Connector Platform

[\(\[github.com/M-Eldeeb-Dev/Rabet-Platform\]\(https://github.com/M-Eldeeb-Dev/Rabet-Platform\)\)](https://github.com/M-Eldeeb-Dev/Rabet-Platform)

A comprehensive platform designed to bridge the gap between visionary Entrepreneurs and talented Co-Founders. It fosters a collaborative ecosystem where ideas meet execution, supported by Event Managers and overseen by Admins.

Deepify E-Commerce Project

[\(\[github.com/M-Eldeeb-Dev/deepify-ecommerce\]\(https://github.com/M-Eldeeb-Dev/deepify-ecommerce\)\)](https://github.com/M-Eldeeb-Dev/deepify-ecommerce)

A Deepify is a premium e-commerce platform engineered for next-generation streetwear with high-performance shopping experience.

Certificates

Python Developer – SoloLearn

Mar 2025

Learned Python from Beginner to Advanced Build complex Applications with scalable patterns.

Elevvo Pathways Internship

Aug 2025

Front-End Internship Focused on React.js and APIs, Automated pipelines and containerized apps.

Full-Stack Development – Microsoft Global Learning Alpha

Oct 2025

Learned React, Laravel, PHP, Express, REST API, SQL.

Built a secure backend Server-Side, deployed production APIs and fetch it on Client-Side.
