Projects

Restaurant App Project

github.com/M-Eldeeb-Dev/Laravel_Restaurant-Project

A simple restaurant management system built with Laravel 12.0 Using CRUD Operation and Relationships.

Weather App Dashboard

(github.com/M-Eldeeb-Dev/Weather-App-Dashboard)

A professional weather dashboard with current conditions, forecasts, and customizable features (**“Reduced API response time by 1.5s.”**)

Berimbolo Security Website

(github.com/M-Eldeeb-Dev/Berimbolo-Security-Website)

Responsive multi-section security services site with modern animations. (**“Achieved 98% Lighthouse performance score.”**)

Fake-Store App

(github.com/M-Eldeeb-Dev/FakeStore-App)

A modern e-commerce application built with React and Vite, featuring a responsive design and seamless user experience (**“Using FakeStore API”**).

Certificates

Front-End Development – Microsoft Global Learning Alpha

Jun 2024

Learned HTML, CSS, JS, Git Essentials to Advanced, Built solid & interactive websites and best practices.

[Certificate of Completion](#)

Python Developer – SoloLearn

Mar 2025

Learned Python from Beginner to Advanced Build complex Applications with scalable patterns.

[Certificate of Completion](#)

Elevvo Pathways Internship

Aug 2025

Front-End Internship Focused on React.js and APIs, Automated pipelines and containerized apps.

[Certificate of Completion](#)

Full-Stack Development – Microsoft Global Learning Alpha

Oct 2025

Learned React, Laravel, PHP, Express, REST API, SQL.

Built a secure backend Server-Side, deployed production APIs and fetch it on Client-Side.

[Certificate of Completion](#)

Languages

Arabic – Native

English – Fluent
